### **Hepatitis Vaccination for Newly Enrolled Students.**

On October 20, 2025, our newly enrolled KG1 students received their first dose of Hepatitis B vaccination. Out of 40 newly enrolled students, 37 were vaccinated, while 13 transfer students also received the vaccine. As you may be aware, the vaccination schedule consist of multiple doses: the second and third doses will be given in the in the following two months, and a booster dose will be administered in the fourth month. The KG1 department held a parent-teacher conference for our new parents, where the teachers took the opportunity to familiarize themselves with the new parents. They discussed the behaviors expected of children in the first plane of development, highlighting that children are capable of learning multiple languages and absorbing both positive and negative influences. Parents were encouraged to assist teachers model the behaviors they expect their children to exhibit, as this stage is crucial for learning. The parents asked questions, shared their experiences and expectations, and expressed gratitude to the teachers, committed to continue paying school fees and food contributions.

### **Vaccination Against Cervical Cancer**

LLC was proud to partner with the Ghana Health Service for a crucial health initiative! On October 12, nurses from the Langbinsi Presbyterian Health Center visited our school to administer the cervical cancer vaccine to our girls aged 9 and above. We're grateful for this vital service, which will help protect the health and well-being of our students. A big thank you to the Ghana Health Service for making this possible!

## Sharing Dakar Experiences with Teachers

Following the two-day midterm break (Friday and Monday) for all basic schools in Ghana, we utilized one of the days (Monday) for Robert, Mary, and I to share our Dakar experiences with the teachers. The discussion was engaging, covering topics such as material presentation, observation, the prepared environment, and the four planes of development. Teachers asked questions for clarification and discussed Montessori challenges and solutions. The session was interactive, sociable, and lovely.

One key aspect of the Montessori Method is observation, which provides teachers with a better opportunity to identify student challenges and devise ways to assist them.

## Construction of A New Volleyball Court

As you may recall, last year's 5K walk was a resounding success, raising vital funds to support sporting activities at LLC. I'm thrilled to announce that the event not only generated funds locally but also garnered support from Albrook School, which contributed significantly to our sporting endeavors. This generosity enabled us to take a major step forward with the construction of a volleyball court.

On October 24, 2025, Fidelis and I, along with the LLC leadership team and teachers, had the pleasure of awarding a contract to Mr. Frank Kumah for this exciting project. The new volleyball court will serve as a recreational facility and provide a conducive environment for students and teachers to engage in sports and physical activities. We are confident that this initiative will promote teamwork, discipline, and overall well-being within our community.

The contractor is expected to handover a completed volleyball court by end of January 2026. We are eagerly looking forward to seeing this project come to life and cannot wait to get our students and teachers actively involved. A huge thank you to Albrook School for their generous support and to everyone who participated in the 5K Walk. Your contributions are making a tangible difference in our students lives.
